EPS REMAN CENTER PRODUCT CATALOG

EPS

OUR CONTRIBUTION TO A GREENER FUTURE!

With pride, we look back on the opening of our EPS Reman Center in 2024 – and would like to introduce you to our workshop. Certified, licensed, and committed to the highest quality, our EPS Reman Center stands for independent reconditioning of engine components, regardless of the manufacturer.

In addition to our on-site service offerings for gas engines, we concentrate our expertise here across 1,200 m² of modern, well-equipped space. This is how we breathe new life into your components – with clear ecological and economic goals. That is our commitment – that is the EPS Reman Center!

Since 2020, we have been part of INNIO Jenbacher GmbH & Co. OG and benefit together from valuable synergies. In this catalog, you will find our products and gain an insight into our portfolio.

Interactive, digital, and available anytime!

Andreas Hülsing

Managing Director

INTERCOOLER

Description of the reman process

- Visual incoming goods inspection including photo documentation and incoming inspection report
- Initial pressure test
- Disassembly of the intercooler
- Cleaning and processing of the intercooler plates
- Cleaning and processing of the cooler core
- Reassembly of the intercooler
- Professional coating in original RAL color
- Final pressure test
- Visual and technical final inspection
- Packaging and delivery of the intercooler

TP 65-250/2

Further pump types available upon request.

Description of the reman process

- Visual incoming goods inspection including photo documentation and incoming inspection report
- Disassembly of the Grundfos water pump
- Cleaning and processing
- Reassembly of the Grundfos water pump
- Professional coating in original RAL color
- Visual and technical final inspection
- Packaging and delivery of the Grundfos water pump

VORSCHMIERPUMPE, ELEKTRISCH

Model	Series
Jenbacher	BR4

Further models available upon request.

Description of the reman process

- Visual incoming goods inspection including photo documentation and incoming inspection report
- Disassembly of the electric pre-lub pump
- Cleaning and processing
- Reassembly of the electric pre-lub pump
- Professional coating
- Visual and technical final inspection
- Creation of the final inspection report
- Packaging and delivery of the electric pre-lub pump

PBS TURBOCHARGER

Pump model

TCR10
TCR12
TCR14
TCR16
TCR18

Further pump types available upon request.

Description of the reman process

- Visual incoming goods inspection including photo documentation and incoming inspection report
- Technical assessment
- Disassembly and dismantling of the PBS turbocharger
- Cleaning and processing
- Balancing of the turbine rotor
- Reassembly using original manufacturer parts
- Visual and technical final inspection
- Packaging and delivery of the PBS turbocharger

EXHAUST MANIFOLD

Model	Series
Jenbacher	BR3
Jenbacher	BR4
Jenbacher	BR6

Further models available upon request.

EPS

Description of the reman process

- Visual incoming goods inspection including photo documentation and incoming inspection report
- Technical incoming inspection
- Disassembly and dismantling of the exhaust manifold
- Cleaning and processing
- Reassembly and welding in of individual original manufacturer replacement parts
- Visual and technical final inspection
- Creation of the final inspection report
- Packaging and delivery of the exhaust manifold

If desired, we can also process your existing exhaust manifold and replace only the defective compensators!
